

StarHub Studios

INTERNAL · YOUR EYES · DRY RUN

You built this. Here is what it does.

Read top to bottom. It follows the order you'll click. Every screen gets three things: what it is, what to point at, and what to say. Nothing here needs interpreting — if it's in this doc, it's on the screen.

DEMO FROM

localhost:5192 — works without wifi

PORTAL PASSCODE

wonderstorm

RUNTIME

About 15 minutes end to end

THIRTY SECONDS — THE WHOLE THING IN YOUR HEAD

One school. Her data, in her layout.

Holly handed you a twenty-slide product vision on Thursday and three real files on Friday night. What you are walking in with is her deck, built — every one of her eleven pages plus Phoenix — running on her roster, her token sheet, and her Wonderstorm Code. Not a mock-up of her idea. Her idea, working.

Door	Who	What it does now
<i>The LOS · /portal</i>	<i>The leader (student)</i>	<i>Declare → Do → Track → Reflect → Adjust → Grow. Eleven pages + Phoenix, exactly her slide order.</i>
<i>Empowerment Coach · /coach</i>	<i>Staff</i>	<i>Her six Expedition Lab leaders by name, the LOS board, contested fines waiting on a Coach, Y5 tokens by studio.</i>
<i>Parent Portal · /parent</i>	<i>Family</i>	<i>Read-only. "This week, in Ashlyn's own words." Plus the five programmes at home.</i>
<i>Five programmes · /programs</i>	<i>The leader</i>	<i>Wonder Reads · Math Path · Spark Science · Puzzle Forge · O.M.G. — the tools she was renting, now owned.</i>

◆ If you only remember one sentence

"Everything on this screen is yours — your roster, your token sheet, your Code, your layout. I didn't design a portal for you. I built the one you drew."

The real numbers that are now live, all from her Friday email: **41 leaders** across four studios (Spark 9 · Discovery 18 · Adventure 8 · Expedition Lab 6 — her sheet calls it Launchpad). **29 leaders** on the Y5 token sheet, **3,064 tokens** in circulation. **Ashlyn = 23**. The Wonderstorm Code's seven agreements are the agreements list a Coach reads before any token moves.

SIXTY SECONDS OF SETUP

Get these open first.

Do this	Detail
Open localhost:5192	The site on your own laptop, no wifi needed. It's already running. If it doesn't load, text Nova "restart wonderstorm". Backup: the-branding-guru.github.io/wonderstorm (same build, needs wifi).
Open four tabs	/portal · /coach · /parent · /programs/omg . Sign into the first three now ; passcode wonderstorm for all.
On /parent	Click Open demo family view . The good screen is behind that click.
Phone	Nova is watching this thread. Anything Holly asks for that isn't on screen: text it, keep talking. Most edits are minutes.

◆ Why sign in beforehand

Typing a passcode in front of a client is the one moment the demo looks like a demo. Do it in the car. Then every tab is one click away and it feels like a product.

STOP ONE

Show that it exists.

What it is	Point at	Say
<i>Home</i>	<i>The headline: Leadership isn't taught. It's practiced.</i>	<i>"Front door. Everything under it works."</i>
<i>The LOS — in the top menu</i>	<i>The six-step loop, then the eleven pages.</i>	<i>"This is your deck, as a page. Now let me show you it running."</i>
<i>Portals ▾</i>	<i>Just open it.</i>	<i>"Three doors. Leader, Coach, Parent. Same record, three views."</i>

Vocabulary on every page is the Acton-safe set you ruled: Leader, Coach, Lab, Expedition, Showcase, Ascent Review, Expedition Lab. "Launch" appears nowhere. If Holly wants a word changed, say yes and text Nova the word — it's a one-line change.

STOP TWO · SIX MINUTES · / PORTAL

Her deck, running.

This is Ashlyn's home. Walk it in the order the day happens. Everything you click actually changes the record — declare a goal and it's on the Coach's board.

Screen	Reads	Say
Home — Today's Plan	"Nothing declared yet. What matters today?" · five programme chips · categories	"Morning starts here. She declares what she intends to do — one tap from a programme, or her own words." Tap Math Path — Lesson 1. Watch it land in the plan.
Weekly Progress	44% · Mon–Fri dots	"The gap between what she said and what she did, visible without an adult standing over her. Slide 2, word for word."
My QSG	42% · 50 custom keychains by Oct 22 · 48 days · +10 tokens	"One hard, self-chosen goal a quarter. Weekly check-ins underneath."
Lab Pulse	6 leaders · 0 complete · 2 on track · 3 needs attention · 1 behind	"Her lab. If everyone finishes, everyone earns 20."
The Wonderstorm Code	Her seven agreements, verbatim	"That's your Code, from Friday night. It's the agreements list — a Coach reads it before any token or fine."
Check Out	"End of day · two minutes, honest"	"Evening closes the loop. Open goals become 'revised', not 'failed!'"

Then the sidebar — one line each, don't linger

Page	One line
Progress	<i>This Week · This Quarter · My Journey · My Patterns · Goal History. Deltas vs last week.</i>
QSG	<i>Three weekly check-ins already logged: +12%, +12%, +18%. The lab pulse table under it.</i>
Work → Portfolio	<i>Not Started → In Progress → Feedback Requested → Revision → Complete. Portfolio is where she curates; Work is where she creates.</i>
Feedback	<i>Request, give, receive — tied back to the work. Feedback → Revision → Improvement.</i>
Community · Calendar · Plan Ahead · History	<i>Feed, groups, 1:1 · one calendar, owner visible · Considering → Planning → Committed · the permanent timeline.</i>
Tokens	<i>23 — her real balance. Ledger shows one line: Opening balance — Y5 token sheet, Session 1. A fine from Gwen waiting to be accepted or contested. Leader-to-leader accountability, Coach as referee.</i>
Phoenix (the ✨)	<i>Slides out over any page. Thinking partner, names its context, never a destination. Rule-based today; the live model is a platform-tier item.</i>

◆ The line for the Tokens page

"Every token has a reason attached. Nothing moves without one. Her 23 is the number on your sheet as of Friday — and the ledger is empty on purpose. Session 1 just started. The first goal she finishes is the first line."

STOP THREE · THREE MINUTES · / COACH

Her six leaders, by name.

The banner at the top says it plainly: names are her Expedition Lab roster; mastery, activity and rank are demonstration values until real sessions are logged. Say that before she does. Honesty here is the sale.

The tile	Reads	What it means
Leaders	6	Ashlyn, Makayla, Declan, Gwen, James, Kairi. Her roster.
Avg Mastery · Active · Needs Support	63% · 4 · 0	Demonstration values. "These fill from the first real week."
LOS today — Ashlyn Y.	0 declared · 0 done · not checked out · 23 tokens	Live from the LOS. Declare something on /portal and it appears here. Do that in front of her.
Lab QSG pulse	Declan 82 · Gwen 74 · Makayla 45 · James 20 · Kairi 0 · Ashlyn 42	Who's thriving, who needs support — slide 2's promise.

The LOS tab — what a Coach can actually do

Block	What's in it
Lab board	Every leader: declared / done / checked out / QSG — Thriving · Working · Needs support.
Studios — Y5 tokens, Session 1	All four studios, her sheet's totals. 29 on the sheet, 3,064 current.
Waiting on a Coach	Contested fines (uphold / dismiss), feedback requests, submitted work (Complete / Revision).
Give tokens · Agreements	Give with a reason. Add or retire an agreement — the Code is editable by her.

◆ Say this about the sheet

"Three rows on your sheet need you, not me: Claire and Kai carry a negative from Y4 but show zero; Gwen carries 60 and shows zero — that looks like a formula, not a reset. Emma and Hollis are on the sheet but not the roster, and Spark has no token rows. I loaded exactly what you sent; tell me the answer and it's fixed in a minute."

STOP FOUR · TWO MINUTES · / PARENT

Read-only, on purpose.

What it is	Point at	Say
<i>The header strip</i>	<i>Ashlyn Y. · rank · streak · mastery</i>	<i>"A parent knows where their kid stands in four seconds."</i>
<i>This week, in Ashlyn's own words</i>	<i>44% weekly goals · 42% stretch goal, 48 days · lab journey · the QSG sentence</i>	<i>"That's the LOS, seen by a parent. She always knows they can see it — reflection, not surveillance. Slide 19."</i>
<i>Reading, math and science this week</i>	<i>Wonder Reads replaces Lexia · Math Path replaces Teaching Textbooks · Spark Science replaces Generation Genius · Puzzle Forge replaces Beast Academy</i>	<i>"The four tools you texted me on the 31st. Rebuilt as yours. A parent can practise at home with the same tools."</i>

◆ The line that closes parents

"A parent can see everything and change nothing. The moment a parent can edit the record, the child stops owning it, and ownership is the whole point."

IF IT GOES DEEP · TWO MINUTES · / PROGRAMS / O M G

The part nobody else has.

David already has the explainer (he sent 👍 Friday night). O.M.G. is now a programme in the portal, not a promise: the 1,400-card deck, at the leader's level, two minutes a day. Open it, draw today's hand, close it.

System	In one breath	If pressed
<i>O.M.G. — Open Minded Goals</i>	<i>How they think inside their own head.</i>	<i>Pre-K to 12th. Fourteen levels, two decks each — Cognitive Thinking and Rational Thinking. Complete. In the portal today.</i>
<i>S.O.S. — Social Operating Skills</i>	<i>How they operate between people.</i>	<i>Read the room, read yourself, choose the response, stay authentic. Five levels, eighteen named skills. Scored by the leader after activities.</i>

◆ Worth saying out loud

"Academics teach what to think. These two teach how — and how to reach the person next to you. That's the reason a Wonderstorm leader looks different from a kid who finished worksheets."

WHAT SHE'LL ASK FOR, AND WHAT TO SAY

Say yes. Then text Nova.

Every one of these is minutes, and Nova is on the thread while you're in the room. Say yes, text the request, keep going. Most will be live before you leave the building.

If she says...	You say	Behind you
"Can we call it ____ instead?"	"Yes. Watch."	Word swap, one line. Two minutes.
"That agreement isn't quite right / add one"	"You can do that yourself from the Coach tab. Or I'll do it now."	Agreements are editable in-app; the seed list changes in a minute.
"The token amounts / store prices are different"	"Give me the numbers."	Store items + amounts are one file. Five minutes.
"Ashlyn's QSG / goals aren't hers"	"They're placeholders. What is it really?"	Seed data swap. Five minutes.
"Can the other studios see this?"	"Every leader on your roster is loaded. Today we're looking through Ashlyn; the other 40 are a profile switch."	True: roster is in. Per-leader LOS profiles = next build.
"Can parents log in for real / can I invite the team?"	"Passcodes today. Real accounts are Tier 1, live in fourteen days."	Auth is the platform-tier item. Don't promise a date shorter than fourteen days.
"Is Phoenix real AI?"	"Rule-based today so nothing a child types leaves the room. The live model is a switch we flip together once we agree what it's allowed to know."	Honest. The Anthropic org exists; it's unfunded by choice until the data rules are set.
"The heroes' contract in eight weeks"	"There's a slot waiting for it. Send it when it's signed."	Community agreements page carries it.

Do not quote a number that isn't on the screen behind you. If something surprises you, "let me pull that up properly" and move on.

LEAVE WITH THESE

Three things in your pocket.

Ask	How to put it
<i>The sheet's three questions</i>	<i>"Claire, Kai, Gwen — what should they read? And Emma and Hollis — roster or not?"</i>
<i>The O.M.G. slot</i>	<i>"Which grades first, and where does it sit in the week?"</i>
<i>Tier 1</i>	<i>"\$4,500 and \$450 a month. Live in fourteen days with real accounts. Walk after sixty if it isn't working."</i>

◆ The closing line

"You drew it Thursday. It's running Saturday, on your data. For less than one family's tuition, it's live for every family in fourteen days."

Brittany shoots the building while you talk — every room from the doorway, two frames each. No children today (school opens the 8th), so no releases needed yet. Then lunch.
