

Working Session — Sat Sep 5 2026 — decisions & punch list

The mastery of being centered, and the life of abundance that follows

Jack Polo · draft, Movement One · September 2026

WonderStorm working session — Sat Sep 5 2026 (Jack, Holly, David; ~5 hrs, recorded)

Raw transcript: pasted by Jack into the Nova session Sep 5 7:40pm (session fbb6d1f7). Holly's own meeting doc: Google Doc 19QVl6s5zGOE6Fvb5t1b-CqSEruey6SjNWo_v1AeTs7Y0 (K-12 math topics; access still pending). David's Claude share: claude.ai/share/073d9c31-4040-4aa7-8790-f5a66d99eddd (scorecard, platform verdict, visual-layer note; PDF "HDT AI Tutor Research Playbook" in his Claude app).

What Jack promised (in Jack's words)

- "That'll be done by tomorrow" — tracker made to make sense: log in, set goals, track work. - Corpus / master library doc for Holly: "You'll have it today." - Tutorial video per subject (Khan-style minimum; Generation Genius ideal; Homeschool Pop cartoons for Sparks/Discovery). Renderings sent for approval before they go in; "a day or two." - Touch base Monday Sep 7. Heroes on core skills ~1.5 weeks out (school starts Tue Sep 8; first two weeks = lip dub / tribe). - First exhibition = 8 weeks from Tue Sep 8 ($\approx$ Oct 27–28, 3 days before Halloween). Show tracker + back end on the projector; invite Jerry (Dragon Dynasty family, education investor).

Tracker decisions (Holly is the authority; hero view first, guide/parent views derive)

1. **Core skills only.** Park ALL leadership content (Vanguard, I Master Me, 10-10 rule, gratitude/wellness/caring subjects). Keep in code, out of UI. Leadership returns later as in-person points/belts once Holly defines the measurable. 2. **Nav bar at TOP.** Tabs = the left dropdown items from Holly's mockup. Holly owes a written breakdown of intent + functionality per tab. 3. **Levels, never grades.** Discovery (1st–5th) = 5 levels; kids move at own pace. Word swap "grade" → "level" everywhere. 4. **Goals = the daily academic goals** for the 2-hour uninterrupted block ("4 lessons math, read 30 min, 2 lessons spelling"). Track daily, show overall progress. 5. **Feedback/scores come from multiple sources:** guide feedback, self, tracker data ("you set big goals, did half — lower them"), peer-to-peer, hero→guide. Never one person's report card. Replace "what practices increased your gratitude score" with "what ways of being show up in the feedback you receive." 6. **Program mapping was wrong:** Lexia / Generation Genius / Beast Academy / Teaching Textbooks are DISCOVERY programs, not 11th grade. LaunchPad heroes do core skills at Saddleback College (AA-equivalent on graduation) — do not build their coursework. 7. **Math depth:** a year of Teaching Textbooks = ~126 lessons + ~18 tests, 21–25 problems per lesson. Current build (7 chapters × 4) "a kid would be done in 2 hours." Jack: copy each Teaching Textbooks table of contents (Math 3 ...) into Nova as Level N math. Holly sending all levels at once. 8. **Shadow Day assessment tool:** on-platform math sampler + reading-level excerpt + collective guide/Holly behaviour & mindset assessment → auto report printed from coach portal, handed to parent at pickup. "Incredible marketing / reciprocity." 9. **Grammar drills** (15 min/day, scaffolded to writing) to replace Lexia (\$1,500/yr). Teaching Textbooks also to be dropped. Total online-platform spend ≈ just under \$4k/yr → zero. 10. **Word-substitution list** ("expedition" etc.) to Holly; she picks final

words. 11. Tabs/ subjects: Science Spark exists; AI faculty characters (Holly's "Hogwarts professors" doc) = voice + script foundation per subject video.

Tutor architecture (David's Claude session, adopted)

- Phase 1: Socratic voice + mastery loop. Blueprints: Khanmigo (restraint/breadth), Synthesis Tutor (voice, hands-on, K-5/neurodiverse). Alpha School = 2-hr model, unverified results, \$40–75k/yr. - Phase 2: generative visual layer (Google generative UI / Veo) orchestrated, not built. - 7-point scorecard: Socratic restraint · recovery from wrong answers · voice naturalness · mastery gating · age appropriateness · subject breadth · cheat test. Same problem through every tool, score 1–5, watch the kids not the AI. - Venture name: **Human Development Technologies** (WonderStorm = flagship customer). Phases: 1 the school, 2 homeschoolers (sales funnel), 3 school networks / licensing (B2B). Acton hostile; Apogee Strong (Matt Beaudreau) friendly. - Holly: deep research on neurodivergent + dyslexia learning ("most kids now"); every subject should work for them. - Lower-grade "living library" kiosk: kid asks a question, Nova answers with a quest/animation (Mr. Bubbers-style, faster).

Other commitments / threads

- Bill-collection texts automation for Holly (Catherine's list of families owing; one at \$4,000). Jack: "give me the list." - Thriller flash mob for exhibition with Eddie Morales / Misha / Fly (Jack's crew; Eddie in town next week). Jack: "we'll make that happen." - Jerry + Rivian (via Mira, ex-In Wonder school) as funding targets AFTER the platform is done. Pitch WonderStorm powered by mythOS, not mythOS. - Holly's finances: \$50k personal loan = 2 months runway; ~40+ heroes; Gheric/Nadia behind on tuition since ~Feb — Jack: deduct from Gheric's share. - Preview link sent to Holly; password "wonderstorm". Holly asked for notes-able access → done. - Holly has 3-day weekend and will READ the documents (OMG explainer sent Sep 4). Jack to send: brand-guru one-sheet, "chain of command" one-sheet (mythOS / Nova / Jack), corpus library. - David: text Jack directly for marketing/sales; JV money conversation "as soon as possible" once they see the finished platform. - Ashlyn (Holly's daughter, 16, pianist) — Jack brought flowers for Brittany's absence; Brittany didn't come to shoot. - Holly's son (18, Chapman, videographer) — wants industry mentors; lip dub film.

Holly owes

K-12 math topics doc (grant access) · core skills per studio/level · tab-by-tab intent/functionality · Teaching Textbooks TOCs all levels · programs-per-studio list · AI faculty doc · logins for Teaching Textbooks/Generation Genius · Catherine's collections list · room photos (7-shot script) · word choices.
