

WHERE THIS ACTUALLY STARTED

You asked us about a \$10,000 app.

We said: don't. Spend it with us instead, and get the platform that solves all of it — not one tool that does one thing.

"Let's put it in the curriculum — we'll be the first to support your cognitive course."

DAVID, ON O.M.G. + THE SOCIAL-SKILLS INTELLIGENCE

Then Holly spec'd it — the documents, the specifics, the meeting. And we built every line of it. Requested. Spec'd. Delivered.

THE SEQUENCE

Win locally, now.
That's how you go global next.

The imprint: Wonderstorm becomes THE school of this community — visibly, credibly, first

The load: the platform answers parents, tells the story, gives the **virtual tour**, books the visit — families arrive already sold

The hours: less of Holly's day selling the school — more of it with the kids. That was the requirement. It's also the design.

Global was never the distraction — it's the destination. The platform wins the community first, proves the numbers, then carries the same imprint outward. Local first is the strategy FOR global, not instead of it.

THE EVIDENCE – YOUR PROBLEMS, SOLVED

Conservative numbers. Measured monthly.

Inquiries going cold → instant response + guided booking → **+30-50% tours booked**

Brochure site → parent-initiation journey → **2-3× site conversion**

Staff buried in messages → platform answers first → **10-20 hrs/week back**

Unsold tour arrivals → pre-sold families → **+20-30% tour-to-enroll**

Word-of-mouth unmanaged → shareable Hero Chronicles → **+15-25% referrals**

The model behind the numbers: every range is the conservative end of published benchmarks for instrumented enrollment funnels — we projected from the low bound, not the promise. Month one measures YOUR baseline; every month after, the report shows actuals against these projections. And the revenue math is simple: **each enrolled family ≈ \$10,000+ per year in per-pupil funding**. Door Two pays for itself at three net-new enrollments. The projections above imply far more than three.

A website is an opinion. This is an instrument.

THE POSITION

First school in the country
with this intelligence woven into daily operations.

O.M.G. and the social-skills intelligence — in the classroom, the curriculum, the front office. Not a chatbot bolted on. A nervous system built in.

Every school says "we care." One school will be able to demonstrate it, measurably, before any other school in America. That position is on this table today.

THE STRUCTURE

A joint venture, at every level.

StarHub owns, operates & evolves the platform and intelligence · **Wonderstorm** owns its brand, curriculum & name · together: **WonderStorm Digital** — scaling the school now, licensing the system to the sector as it proves out. **Revenue the platform creates is shared at every door.** We only win together.

This was the point from the first conversation: "so you guys can make money with it." Yes — both of us.

THE THREE DOORS

Pick your depth. Same partnership.

Door 1 · Go Live

\$10,000

+ \$1,000/mo

The delivered platform live on your domain — enrollment engine, **virtual tour**, portals, measurement. The same \$10k, except this one works.

PLAN: \$10k deposit = paid in full

Door 2 · The Engine

\$25,000

+ \$2,000/mo

The full operating system — comms, campaigns, content engine, ops integration, quests live, intelligence in the curriculum. First in the country.

PLAN: \$10k deposit + \$1,250/mo × 12

Door 3 · The World

\$50,000

+ \$3,000/mo

The method productized — licensing package, partner schools, certification. The school stops buying software and owns a digital business.

PLAN: \$10k deposit + \$3,333/mo × 12

Payment plans at every door — up to 12 months, \$10,000 minimum deposit.

THE DECISION

The platform exists.
The only question is **whose name it wears.**

We built it for Wonderstorm and we'd rather it wear Wonderstorm's name. What it solves, every charter school in the sector needs.

Pick a door today, and the first monthly report lands in 30 days. — Jack
