Notes for the developer

Studio codes are the tab names in the source workbook: DS = Discovery, AS = Adventure, LP = Launch Pad.

Starting Tokens (Y4) is the balance carried over from last year. **Current Total** is the running Session 1 balance, which will change as session earnings, snack, contract and hero shop spends are entered.

Two rows where the columns disagree, both unresolved in the source: Claire and Kai carried negative Y4 balances (-3 and -14) that show as 0 current; Gwen carries 60 but shows 0 current, which looks like a formula break rather than an intentional reset.

Hero names are unique across all three studios, so name is currently a safe key. Studio membership can change between sessions, so treat studio as an attribute rather than part of the identity.
