

WonderStorm — Saturday 5 September 2026, 1:00pm, at the school

Holly (David if present) · Brittany photographing · you run it.

The school is CLOSED until Sept 8 — no children Saturday. The shoot is the building and every room.

Before you leave the house

- Laptop charged. Site runs at localhost:5192 with no wifi: `cd worlds/wonderstorm-solid && bun run dev` (already checked).
- Portal passcode: **wonderstorm**
- Shot list on Brittany's phone: `wonderstorm-shot-list.pdf` (Active Docs).

The links (all on the Branding Guru lane, verified)

What	Link
The academy site (published)	https://the-branding-guru.github.io/wonderstorm/
The LOS (her deck, live)	http://localhost:5192/portal · preview /wonderstorm/portal
Session pack (index + nav map, open this first on the laptop)	https://the-branding-guru.github.io/previews/6aa70edeec0d/
Tools & tracker brief (S.O.S., O.M.G., replacement programme)	https://the-branding-guru.github.io/previews/c3c7038f2483/
The Three Doors (pricing)	https://the-branding-guru.github.io/previews/6ca92653f836/

Working Session deck (8 slides, arrow keys, P = PDF)	https://the-branding-guru.github.io/previews/9e6be1946d04/
JV heads-of-terms (you sign as CEO)	https://the-branding-guru.github.io/previews/7bf9ebc9aea1/
Your dry run (yours only, do not show)	https://the-branding-guru.github.io/previews/6c550a4ae2dc/

Do NOT send any link ahead of time. Walk it live.

Running order (about 75 minutes, then the shoot)

1. **1:00 — Count the rooms.** Walk the building with Holly first (five minutes) so Brittany knows every room and can start on the rooms while you talk.
2. **1:10 — The build.** Home → S.O.S. → The Method. Line: "This already exists. The only question is how much of it you want turned on."
3. **1:20 — THE LOS, her deck made real.** Open /portal (passcode wonderstorm). It IS her HOME slide, live: declare a goal in one tap (the four programme chips), tick one done, write the journal line, then **Check out** — the two-minute ritual from slide 19. Walk the sidebar in her order: Progress (This Week / Patterns) → QSG (add a weekly check-in) → Work (move an item to Feedback Requested) → Portfolio → Feedback → Community (post a shout-out) → Calendar (owner visible on every event) → Plan Ahead (move a goal to Committed, watch it land on the Calendar) → History → Tokens (accept the pending fine, redeem in the store). Click Phoenix on any page: it slides out, says what context it used.
4. **1:40 — Coach portal.** Dashboard shows "LOS today" (what Ashlyn declared, did, owes). Then the **The LOS** tab: the lab board (who declared / did / checked out / QSG), what is waiting on a Coach (answer a feedback request, witness submitted work), give tokens with a reason, edit the community agreements live. Open a leader → **Programmes**: reading, math, science, puzzles in ONE place. Parent portal: same child from home, "This week, in Ashlyn's own words."
5. **1:48 — The four programmes.** Open Wonder Reads, do one passage live; Math Path, two problems. Show the score land in Today's Plan and the Coach view.
6. **1:42 — Tools brief + O.M.G. + S.O.S.** (talk track below). Her four tools (Lexia, Teaching Textbooks, Generation Genius, Beast Academy) each have a working Wonderstorm replacement in the portal. Content deepens every week; the engines are live today. O.M.G.: which grade bands go first, where it sits in the timetable.
7. **1:55 — Three Doors.** Tier 1: \$4,500 + \$450/mo, live in 14 days, 60-day out. "For less than one family's tuition, the front door starts converting."
8. **2:05 — Terms.** Only if she reaches for it: JV heads-of-terms. Otherwise: "it's built and waiting; it goes on your domain the day we agree."
9. **2:15 — The shoot, with you.** Building + sign in late light · every room, same height and lens, as found then staged · an expedition table · the S.O.S. corner · Holly and Dave in the rooms. Five-minute stage per room with Holly.

O.M.G. and S.O.S. — the talk track

Her three decisions, in plain words

1. **The O.M.G. slot.** David already said yes to O.M.G. at his house. The only question left is scheduling: which labs start first, and where in the week it sits (a 15-minute daily hand, or one longer block). You are not re-pitching it. You are asking "when."
2. **Tier 1.** \$4,500 to put the site and the portal live on wonderstorm's domain, \$450 a month to keep it running, live in 14 days, 60-day out. Yes, no, or when.

3. **Side by side.** Her word to run the four Wonderstorm programmes next to the rented tools for one cycle, so nobody is asked to trust them on faith. Then she cancels the subscriptions on her own timing.

What O.M.G. is (30 seconds)

"Open Minded Goals is my own curriculum. Pre-K through 12th grade, fourteen levels. Each level is two decks of fifty cards: Cognitive Thinking, which trains how a kid processes the world, and Rational Thinking, which trains how a kid responds to it. It doesn't teach what to think. It trains how."

How it works in the portal (20 seconds)

"Every day a leader draws a hand of five cards at their level. Cognitive cards are things to do. Rational cards walk them through a situation: what happened, my first thought, a more open-minded thought, and how open was I. It is a two-minute ritual, same as the morning declare. Everything they write lands in their portal, and you see it in yours."

Why it benefits her school (the three lines that matter)

- **It is the missing spine.** Wonderstorm sells character and leadership. Every other tool in the building is academic. O.M.G. is the one thing that trains the thinking underneath all of it, daily, with evidence.
- **It is hers to own, not rent.** Licensed to Wonderstorm inside the platform. No subscription, no vendor. Something she can show a parent that no other school has.
- **It makes your accountability real.** The "1 Needs Support" tile, the patterns page, the coach view: all of that reads how a kid is thinking, not just what they scored.

What S.O.S. is (30 seconds)

"Social Operating Skills. It's the system that teaches a child to read a room and read themselves, and respond as a leader without losing who they are. The core practice is Social Calibration: five levels, from 'can't read the room' to 'leads the room.' A child who cannot read a room is sending one."

Where S.O.S. lives (already built)

- Public site: the S.O.S. page (the /calibration page), in the top nav.
- Leader portal: Calibration, I Master Me, Check-In. The kid rates and practises; it feeds their mastery.
- Coach portal: 360 & Calibration tab. Holly sees every leader's level and who needs support.

If she asks "is this Acton?"

"No. Not one Acton word, not one Acton tool. O.M.G. is mine, S.O.S. is mine, the platform is StarHub's. That is why you can own it."

Leave with

- Her word to run the four programmes side by side with the rented tools this cycle
- O.M.G. slot decision
- Tier 1 yes / no / when
- A date for the people shoot (school day after Sept 8) and the release form in Holly's hands for it
- Photos on Brittany's card

Do not

- Put anything on their domain before signature or payment.
- Photograph any child who happens to be there. No releases yet.
- Apologise for the reschedule.
